

A Parent's Guide to Finding Homework/Spellings on Google Classroom

With your child's homework now being set via Google Classroom, this document details how you find their work. Teachers will spend time demonstrating this to your child in school, something we did not have time to do prior to lockdown.

1. Type www.gmail.com into the internet explorer search engine, then log in using your child's username and password which has been previously emailed to you. (Your child may already know these details)

2. In the top right hand corner there are 9 dots called the 'Waffle'. Click this then select the 'Classroom' icon.

3. Click on your child's class page in Google Classroom. This will open up on the class home page and 'Stream' (**which is basically a newsfeed of recent announcements and reminders**). It is worth keeping an eye on this for communication purposes.

4. At the very top of the homepage are 4 headings. (You only really need to take notice of 'Stream' and 'Classwork'). Click on 'Classwork'

Stream Classwork People Grades

5. On the left hand side of the page are all the subject specific topics (1). Click on the 'Homework' topic folder to view all the homework set. You can also see the 'Homework' folder at the top of the page (2). Year 6 children will not have a folder but their homework will appear as a document here. There is a 'Spellings' folder which will contain all the spelling lists for the half term.

Please note: formats may vary when using different devices. I pads and PC's are best to use but Google Classroom can also be accessed on a mobile phone.

If you are struggling or need any advice please contact Gill in the office.
